

Common Features

- 84" height
- 9', 12' and 15' width available
- 20" top mesh
- Nickel-plated brass grommets
- 100% polyester fabric
- Inherently fire retardant materials that meet the requirements of NFPA 701 small scale and California Section 13115
- Machine washable and dryable (must follow directions)
- If installed properly, privacy curtains satisfy F-Tag 460 for full visual privacy

Useful Information

FLOOR GAP

This measurement (the gap between the floor and the curtain) should be 18" or less. The best rule is ceiling height minus 18 inches.

MESH HEIGHT

Fire code stipulates that the curtain fabric needs to be suspended from the ceiling in a manner that will allow the fire sprinklers to spray across the top of the fabric barrier. This can be done with suspended track, PVC drops, chain drops, or mesh.

MESH SPACING

Code requires 1/2" holes in the mesh to ensure a compliant flow of water from fire sprinklers through the weave.

PRIVACY GAPS

Sanctioning bodies require that cubicle curtains cover all patient privacy gaps, including gaps that can be seen through room windows, alternate doorways, and any position in the room interior.
