8		2	3/8 Hex Locknut	12		4	5/16 Flat Washer
ns = not shown							

ASSEMBLY INSTRUCTIONS

CAUTION

Read this document before assembling the wheeled pusher shovel.

Attach Blade to Frame

Insert three 5/16" x 1" carriage bolts through the face of the blade into the frame. Be sure to align the square portion of the bolt head with the square holes in the blade. Secure with three 5/16" locknuts and tighten so that the smooth heads of the bolts are embedded into the face of the blade.

NOTE: Locknuts require more pressure to install than regular nuts. Be sure to tighten each one completely to ensure proper performance.

Attach Handle to Frame

Insert two 5/16" x 2" clevis pins and two 1/4" flat washers through the outside of the frame and into the handle. Secure with two 1/4" flat washers and two split rings.

Attach Wheels to Frame

Attach the wheels to the plastic frame only. Insert two 1/2" x 1-1/2" shoulder bolts through the outside of each wheel and into the frame with a 5/16" flat washer on each side of the frame. Attach a 3/8" locknut to each shoulder bolt and tighten thoroughly.
